

Third Meeting for Young Women in Mathematics
University of Freiburg, February 12-14, 2017

Schedule

Sunday, February 12

17:00 Aperitif and Registration

Monday, February 13

08:45 Registration

09:00 – 9:30 Hannah Bergner (Freiburg)
Logarithmic differential forms on dlt pairs

09:45 – 10:15 Ana María Botero (Berlin)
Intersection theory of b-divisors on toroidal varieties

Coffee/Poster session I

11:45 – 12:15 Sabine Braun (Karlsruhe)
 L^2 -cohomology and Riemannian volume

Lunch

14:00 – 14:30 Gaia Comaschi (Lille)
Moduli spaces on the cubic threefold

14:45 – 15:15 Chiara Damiolini (Essen)
Conformal blocks associated to twisted groups

Coffee/Poster session II

16:45 – 17:15 Ksenia Fedosova (Bonn)
Selberg zeta function for hyperbolic orbifolds

19:00 Conference Dinner

Tuesday, February 14

09:00 – 09:30 Doris Hein (Freiburg)
Invariant Morse homology in contact dynamics

09:45 – 10:15 Victoria Lebed (Dublin)
How braids can help to compute Hochschild cohomology

10:30 – 11:00 Amandine Pierrot (Strasbourg)
Explicit computation of the (ϕ, Γ) -module associated with some coverings of the projective line

Coffee

11:30 – 12:00 Mara Ungureanu (Berlin)
The geometry of divisors with multiplicity on projective curves

12:15 – 12:45 Veronika Wanner (Regensburg)
Poincaré duality for the real-valued de Rham cohomology of non-archimedean Mumford curves

Lunch, Departure
